New Fertility Study Sheds Light on Increasing Pregnancy Success

**Principal Investigator of GENESIS NETWORK FOR REPRODUCTIVE HEALTH
Available to Discuss Breakthrough Fertility Study Published This Month in
Fertility & Sterility and Other Emerging Fertility Treatments and Issues**

Lawrence B. Werlin, the Principal Investigator of GENESIS NETWORK FOR REPRODUCTIVE HEALTH, is available to discuss a fertility breakthrough study published this month in *Fertility & Sterility*. The study offers new data for increasing pregnancy success for women of advanced maternal age. He is also available to discuss other emerging fertility treatments and issues that affect 6.1 million people per year in the United States suffering from infertility.

New Study Reveals that PGD Increases Pregnancy Success for Women of Advanced Maternal Age

According to recent study conducted by Dr. Lawrence Werlin and GENESIS Network for Reproductive Health, PGD (Preimplantation Genetic Diagnosis) is cited as a major advancement in fertility treatments. PGD is gaining national and international attention for what it offers. PGD screens and tests for abnormal chromosomes in the beginning stages of in-vitro fertilization offering valuable information early on for prospective parents about success rates and likelihood for passing on genetic diseases.

Dr. Lawrence Werlin is available to discuss new findings for high-risk groups, women of advanced maternal age (38 years +) and those with reoccurring pregnancy loss.

WERLIN AVAILABLE TO DISCUSS OTHER TREATMENTS AND ISSUES

- Treatments-options for increasing chances for pregnancy success and latest trends
- An 'a to z' perspective on PGD -- how the treatment PGD is designed offer vital information early in the process by detecting missing or abnormal chromosomes which are a factor in failed pregnancies.
- PGD's application to detect genetic diseases such as cystic fibrosis or down's syndrome
- PGD -- what the latest studies say, who it applies to and what it offers
- Patients and family therapist also available to speak on camera and share their stories
- The business of fertility

Intriguing Media Expert

Dr. Werlin, "The Werl," is a leader in Reproductive Endocrinology and Fertility, co-founder of GENESIS Network for Reproductive Health, and founder and medical director of Coastal Fertility Medical Center. He is a noted international authority on the uses and study of PGD and the former director of the Hoag Memorial Hospital Fertility Services. He was selected as Best Doctors in America list from 1996 – 2002 and has been an expert source for national and international media including *The Associated Press*, *Boston Globe*, *The New Yorker*, ABC, CBS, NBC, and KCAL.
