

Coastal Fertility Medical Center's 13th Annual Miracle Babies Halloween Reunion is Another Huge Success!

The 13th annual Miracle Babies Halloween Party was a huge success this year! Over 450 parents and 350 children (dressed as spooky ghosts and goblins, dashing superheroes and beautiful princesses) shared the opportunity to celebrate their very special origins with Dr. Werlin and his team of specialists. Even Fox Television joined in the excitement as they came out to cover the event on their news broadcast, capturing the children's exuberance as they played and partied with other families. The Orange County Register also came out to photograph the fun. The children paraded their festive costumes in the Halloween costume contest, sang their hearts out with karaoke, and enjoyed the laughter of other children who share their common bond through the miracle of their births.

Patricia Wilson, who has made headlines with her unique story, was also in attendance with her son after flying from across the country to join in the festivities. Dr. Werlin offered Patricia new hope after she had been told by eight different doctors that she would never have a child. Using 14-year-old frozen embryos donated by another couple, Dr. Werlin was able to make Patricia's dream of motherhood come true with the birth of her son, Nathan, earlier this year. The Wilsons and other families blessed by the miracle of life were delighted to spend the day with those who share the joy of parenthood, and overcame great challenges to achieve it.
